REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicants' response, which included cancellation of claims 1-8, 10, 15, 17 and 19 and amendment to claims 9, 12 and 13, filed on 4/25/2006, is made of record. Claims 9, 11-14, 16 and 18 are now pending.

Applicants' traversal to overcome the 103 rejection over Seitz et al., made in the previous office action is not persuasive. Applicants argued that phosgene reacts with nitro compounds and therefore one trained in the art would not be motivated to use nitrobenzene as solvent for such reactions. But the reference cited by the applicants does not relate to nitrobenzene and applicants are using nitrobenzene as solvent for instant process. It is clearly contradicts the applicants argument that nitrobenzene will react with phosgene.

However, applicants have limited the instant scope of the claims to nitrobenzene as solvent and have asserted that the use of nitrobenzene results in unexpected/superior yields even without catalyst as seen in examples 23-34 in Table A.

Hence, the prior art 103 rejection over Seitz et al., is deemed as obviated.

Claims 9, 11-14, 16 and 18, therefore, would be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
